

CISO Assistant

**One-stop-shop
for cyber security
management**

One platform to manage your cybersecurity — smarter, simpler, and connected

Built-in libraries with over 100 standards and frameworks across industries and regions — plus the ability to add your own

Focused on operational GRC, bringing all your activities into one simple, centralized action plan

Productivity-first: catalogs, links, clones, auto-suggestions, keyboard shortcuts, automated quality checks, and even frameworks mapping

Suitable for startups, large enterprises, and consultants alike

Open-source solution with an active community and translations in +20 languages

Pro plan available as SaaS or on-premises — flexible to meet everyone's needs

A full community edition is available for free — forever

Vision

« A platform to bring all your management activities in a single place and focus on what matters most »
